

SecurePac

EXTERNAL ISU-90 CONTAINER SYSTEM

PROTECTION FROM MOISTURE INDUCED RUST & CORROSION

SECUREPAC IS A GAS-TIGHT, WATERTIGHT, LONG TERM STORAGE ENCLOSURE THAT FULLY ENCAPSULATES & PROTECTS ASSETS FROM CORROSION & DAMAGE.

THE PROBLEM: ISU-90 CONTAINERS SHIELD EQUIPMENT FROM HARSH ENVIRONMENTS, BUT MOISTURE TRAPPED INSIDE CAN SILENTLY CAUSE CORROSION, REDUCE READINESS, AND PUT VALUABLE STORED ASSETS AT RISK.

THE SOLUTION: SECUREPAC CREATES A SEALED MOISTURE FREE BARRIER AROUND THE EXTERIOR OF THE ISU-90 CONTAINER. SECUREPAC HELPS PROTECT STORED EQUIPMENT FROM CORROSION BEFORE IT STARTS.

FEATURES & BENEFITS:

- **COMPLETE CONTAINER ENCAPSULATION:**
SecurePac fully encloses assets stored inside the ISU-90 container, creating a low-oxygen, low-moisture environment that helps preserve equipment condition and usability during long term storage.
- **COST AVOIDANCE AND ASSET PROTECTION:**
By helping prevent corrosion before it starts, SecurePac supports long term asset preservation and can reduce costly repair, replacement, and readiness issues.
- **TESTED & PROVEN OUTDOOR PROTECTION:**
SecurePac is designed for outdoor storage environments where humidity, salinity, rainfall, and UV exposure can accelerate corrosion and material degradation.
Built-in UV protection helps maintain the integrity of the enclosure and supports reliable protection in harsh exterior conditions. Official test reporting is available upon request.
- **SIMPLE DEPLOYMENT USING STANDARD EQUIPMENT:**
SecurePac requires no specialty equipment for setup.
Standard handling equipment, such as a forklift, is all you need!
- **DURABLE & REUSABLE**
- **SCALABLE & PORTABLE, CUSTOM SIZES AVAILABLE**
- **100% BERRY COMPLIANT**
- **7 YEAR WARRANTY**
- **MADE IN USA**
